December 18, 2017

The following are proposed curricular changes in the College of Nursing and Health Sciences. If you have questions or concerns, contact Dr. Debra Jansen at jansenda@uwec.edu or 715-836-5183 within 15 days of this notice.

In light of changes by the Chemistry Department, with Chem 105 (3 credit lecture course) and Chem 106 (2 credit lab + discussion course) replacing Chem 103 (4 credit lecture + lab course) for Fall 2018, the Department of Nursing approved the following changes on December 7, 2017:

For all the undergraduate nursing programs for which general chemistry is a requirement, e.g., the traditional undergraduate nursing program, the BSN Completion program, and the accelerated nursing program, students must complete Chem 103 General Chemistry or Chem 105 and Chem 106. Chem 105 and Chem 106 together meet the nursing general chemistry requirement and constitute one course for the purpose of the nursing admission criteria. Students must achieve a grade of C or better in both Chem 105 and Chem 106 (not an average of the two).
